The second annual Magic Camp is going on. But in this case magic stands for, "Mentoring A Girl In Construction.

It's another example of What's Right in our community.

Professionals are teaching campers in pink hard hats that construction isn't just for boys.

This week, the girls built 5 picnic tables that'll be given to the Ace Charter School in Camarillo. Carpenters, pipe-fitters and sheet metal workers are teaching them their trades. Next they'll be making their own tool boxes.

And Thursday the Magic campers will be visiting construction battalions at Naval Base Ventura County.

The National Association of Women in Construction hopes to attract even more campers next year.

Visit www.mentoringagirlinconstruction.com for more information about Magic camps in your area.
